

PROJECT: Johnson High School Multipurpose Activity Center

LOCATION: Buda, TX

SIZE: 80,000 SF

PROJECT TYPE: Education / Athletics

ARCHITECT: Huckabee

GENERAL CONTRACTOR: CORE Construction

ROOF PANELS: AS-24

OVERVIEW:

Johnson High School's new Multipurpose Activity Center provides 80,000 square feet of covered space for athletics, fine arts, practices, rehearsals, and other student activities. The 200' x 400' pre-engineered metal building features a 200-foot clear span, keeping the entire turf area open with no interior columns. Alliance supplied the 24 ga. AS-24 standing seam roof system in Kynar Stone Gray, along with matching trim. The facility stands just over 40 feet tall and gives Hays CISD a large, flexible space designed for year-round use.

FEATURES:

- 200' clear span, unobstructed interior
- 40'-9½" overall building height
- 24 ga. AS-24 roof system
