STEEL BUILDING SYSTEMS

PROJECT: MEAD PUBLIC WORKS FACILITY

LOCATION: Mead, CO

SIZE: 74,560 SF

PROJECT TYPE: Community

GENERAL CONTRACTOR: Krische Construction (KCI)

ROOF PANELS: AS-24

WALL PANELS: R-Panel, C-Panel

OVERVIEW:

Completed in 2022, the Town of Mead Public Works Facility provides expanded shop, service, and administrative space for the growing Colorado community. Working with KCI Construction, we supplied the engineered steel building system for the 11,000-square-foot facility, including three connected building sections, four service bays, mezzanine framing, and multiple architectural wall panel profiles.

FEATURES:

- Three connected steel building sections
- Four 14' × 14' service bay openings
- Mezzanine framing and metal floor decking
- AS-24 roofing and architectural wall panels
