STEEL BUILDING SYSTEMS

PROJECT: Larimer County Maintenance Facility

LOCATION: Livermore, CO

SIZE: 15,100 SF

PROJECT TYPE: Community

GENERAL CONTRACTOR: Saunders Heath

ROOF PANELS: AS-24

WALL PANELS: Reverse-R, R-Panel

OVERVIEW:

Completed in 2021, Larimer County's Livermore maintenance facilities replaced an aging shop with expanded space for road and bridge operations. Working with Saunders Heath, we engineered and supplied steel building systems for a maintenance shop and dedicated sand and salt storage building. The project features AS-24 standing seam roofing, multiple wall panel systems, and specialized framing to accommodate large maintenance vehicles.

FEATURES:

- Approximately 15,100 SF across two buildings
- Nine 14' × 16' maintenance bay openings
- 22-gauge AS-24 standing seam roofing
- Galvanized framing for sand and salt storage
